

# EXTRUDED ACRYLIC SPECIFICATION SHEET

## Product Overview

Extruded (XT) acrylic sheet is favoured for its clarity and thickness tolerances. It is relatively cost competitive in relation to other clear materials such as cast acrylic sheet. With excellent weathering characteristics XT is ideal for construction (glazing, protection), outdoor displays, poster covers and signage.

Extruded acrylic is used for applications such as store displays, magazine shelving units or light diffusers in the retail environment. Extruded Acrylic is favoured for such applications due to its optimum light transmission level. XT sheets including all high impact grades can be used in contact with foodstuffs, and meet all current European food control legislation.

Extruded acrylic sheets from Williaam Cox are available in clear, opal white for signage and light diffusers, black for POP displays and glasslook clear & matt finishes. Acrylic Mirror is used in public areas where there is a high risk of breakage. It is stocked in silver but is also available in gold and in “one way” variations. We also stock 3mm Prismatic, used for light diffusion in signage and lighting applications, as with all extruded acrylic this product is UV stable and will maintain its appearance long term.

Custom sheet sizes: are now available from a minimum size of 500 x 500mm up to a maximum of 3050mm and max width of 2050mm. By using a custom sheet sizes from Williaam Cox it allows you to reduce waste and maximise competitiveness. For more information on custom sheet sizes please contact the sales office and we will be happy to quote you.

Extruded Acrylic is easy to fabricate, it can be moulded, hot line bent, glued, machined, polished and laser cut. For information on these and other processes please contact us.

XT sheet is available ex stock in many different thicknesses
